OIL ONLY - WHITE

OIL-ONLY sorbent is a hydrophobic polypropylene product that absorbs and contains oil-based liquids (hydrocarbons) on land and water. It is lightweight, flame resistant, non-toxic and floats even when fully saturated. Absorbing up to 30 times its own weight, it is a cost-effective solution to your safety requirements.

Choose the grade of Pads and Rolls for your specific use:

- **SONIC BONDED**: Excellent sorbency, for general use with low lint
- **LAMINATED**: Provides extra strength for more aggressive environments, highly absorbent with no lint

♦ Suitable for all Petroleum Products such as Hydraulic, Motor Oil, Fuels, Diesel, Solvents, etc.
♦ No Water

Not sure which sorbent to use, refer to our CHEMICAL APPLICATION GUIDE on page 3.
PADS
- Dimpled, sonic bonded pads absorb and contain all oil based fluids on land or water.
- Pads are flame resistant, non toxic and float on water even when fully saturated.
- They are commonly used in manufacturing and production facilities for everyday maintenance applications absorbing fuels, solvents, diesel, hydraulic, lubricants, etc.
- Also used to skim oil off water during an oil spill emergency.
- Perforated to help reduce waste.

ROLLS
- Dimpled, sonic bonded rolls absorb and contain all oil based fluids on land or water.
- Rolls are flame resistant, non toxic and float on water even when fully saturated.
- They are commonly used in manufacturing and production facilities for everyday maintenance applications absorbing fuels, solvents, diesel, hydraulic, lubricants, etc.
- Also used to skim oil off water during an oil spill emergency.
- Perforated to help reduce waste.

SOCKS
- Oil Only socks absorb all oil based fluids (hydrocarbons) not water.
- Used to contain spills and leaks.
- Flexible enough to fit around leaky equipment and drums.
- Quick and easy cleanup and disposal. Can be incinerated after use to reduce waste.
- Commonly used in manufacturing and production facilities for everyday maintenance applications absorbing fuels, solvents, diesel, hydraulic, lubricants, etc.

BOOMS
- Oil Only booms absorb all oil based fluids (hydrocarbons) on water.
- Used to absorb and contain marine spills on open water.
- They will float even when saturated with oil.
- They have a strong outer mesh construction with a sturdy nylon rope running the length of the boom with steel clips to easily connect together to form a barrier along the perimeter of the spill.
- Can be incinerated after use to reduce waste.

PILOWS
- Used for to contain spills, leaks and nuisance drips in tight, hard to reach areas.

BILGESKIMMERS
- Used to remove floating oil from water in sumps, bilges, catch basins and settlement ponds.

DRUM COVERS
- Pre-cut to fit a standard 55 gal drum
- For use either indoors or outside.
UNIVERSAL sorbent is a hydrophilic polypropylene product that absorbs all water based liquids, including aggressive acids and bases. Also suitable for hydrocarbons such as oils, fuels and solvents*. Absorbing up to 25 times its own weight, it is a cost-effective solution for your spill cleanup.

* Can be applied without fear of reaction (some exceptions may apply to strong oxidizing materials)

Choose the grade of Pads and Rolls for your specific use:

- **SONIC BONDED**
  - Excellent sorbency, for general use with low lint

- **LAMINATED**
  - Provides extra strength for more aggressive environments, highly absorbent with no lint

PADS
- Dimpled, sonic bonded pads absorb most fluids, including aggressive acids and bases.
- They are commonly used in manufacturing and production facilities for most MRO applications, absorbing oils, fuels, solvents, acids, bases, water, coolants, glycols, etc.
- Perforated to help reduce waste.

ROLLS
- Universal dimpled, sonic bonded rolls absorb most fluids, including aggressive acids & bases.
- They are commonly used in manufacturing and production facilities for most MRO applications, absorbing oils, fuels, solvents, acids, bases, water, coolants, glycols, etc.
- Designed to cover large areas quickly or trimmed for smaller spaces.
- Perforated to help reduce waste.

SOCKS
- Universal socks absorb most fluids, including aggressive acids and bases.
- Used to contain spills and leaks.
- Flexible enough to fit around leaky equipment and drums.
- Quick and easy cleanup and disposal. Can be incinerated after use to reduce waste.
- They are commonly used in manufacturing and production facilities for most MRO applications, absorbing oils, fuels, solvents, acids, bases, water, coolants, glycols, etc.

BOOMS
- Universal booms absorb most fluids, including aggressive acids and bases.
- Used to absorb and block running liquid from sensitive areas.
- Easily molds around machinery or barrels.
- They have a strong outer mesh construction with a sturdy nylon rope running the length of the boom with steel clips to easily connect together to form a barrier along the perimeter of the spill.
- Can be incinerated after use to reduce waste.

RAG RUG MATTING
- Used to absorb non aggressive liquids in high traffic production area walkways.
- Mottled color hides grease and grime.
- Made from recycled materials.

PILLOWS
- Used for to contain spills, leaks and nuisance drips in tight, hard to reach areas.

DRUM COVERS
- Pre-cut to fit a standard 55 gal drum.
- Absorbs drips and spills when pumping liquids.
HAZMAT sorbent is a hydrophilic polypropylene product that absorbs all types of caustics, aggressive acids, bases, solvents, hazardous or unknown liquids. Perforated to help reduce waste. Color coded for high visibility and identification in an emergency.

PADS
- Dimpled, sonic bonded pads absorb most fluids, including aggressive acids and bases.
- They are commonly used in laboratory environments where the smallest of fluid releases could be a major burn or drain hazard.
- Perforated to help reduce waste.

ROLLS
- Hazmat dimpled, sonic bonded rolls absorb most fluids, including aggressive acids & bases
- They are commonly used in laboratory environments where the smallest of fluid releases could be a major burn or drain hazard.
- Designed to cover large areas quickly or trimmed for smaller spaces
- Perforated to help reduce waste.

SOCKS
- Hazmat socks absorb most fluids, including aggressive acids and bases.
- Used to contain spills and leaks.
- Flexible enough to fit around leaky equipment and drums.
- They are commonly used in laboratory environments for emergency spill situations.

Not sure which sorbent to use, refer to our CHEMICAL APPLICATION GUIDE on page 3
GENERAL PURPOSE - GREY

GENERAL PURPOSE sorbent is a cellulose/polymer blend that easily handles any spill, from water based solvents to hydrocarbons. It has a strong wicking action and will absorb up to 40 times its own weight. *(Not for use with acids, bases or aggressive fluids.)*

The best choice for a no-decision spill response on land.

**GREY - GENERAL PURPOSE (Cellulose/Polymer Blend)**

- **Suitable for All Non-Aggressive Liquids**
- **No Acids and Bases**

**SOCKS**
- General Purpose socks absorb most non-aggressive liquids, such as oils, fuels, solvents, water, coolants, glycols, etc.
- Highly absorbent and fast wicking when used with water based liquids.
- Flexible enough to fit around leaky equipment and drums.
- Quick and easy cleanup and disposal with no drips.
- Not for use with acids, bases or aggressive fluids.

**PILLOWS**
- General Purpose pillows absorb most non-aggressive liquids, such as oils, fuels, solvents, water, coolants, glycols, etc.
- Highly absorbent and fast wicking when used with water based liquids.
- Used to contain spills and leaks in tight, hard to reach areas.
- Quick and easy cleanup and disposal with no drips.
- Not for use with acids, bases or aggressive fluids.

## DRUM SPILL KITS

### 30 US GAL DRUM
- **Color**: Blue
- **Size**: 17”dia x 32”height

### Contents:
1. 30 gal Poly Drum with Lever-lock style lid band
2. 25 - Sorbent Pads (16”x20”) Heavy Weight
3. 3 - Sorbent Pillows (8”x18”) Heavy
4. 6 - Sorbent Socks (48”x3”)
5. 1 - Sorbent Sock (144”x3”)
6. 1 - Bag Granular All Purpose Absorbent (20lbs)
7. 10 - Hand Wipes
8. 1 - Knife
9. 1 - Roll Duct Tape
10. 3 - Disposable Respirators N95
11. 3 - Pairs Blue Disposable Nitrile Gloves
12. 1 - Pair Safety Goggles
13. 4 - Disposal Bags with Ties
14. 1 - Instruction Sheet

### Item Number | Description | Sorbent Capacity
--- | --- | ---
UBDSK60 | Universal/Chemical | 60 liters/16 gallons
OBDSK60 | Oil Only | 60 liters/16 gallons

### 55 US GAL DRUM
- **Color**: Blue
- **Size**: 22¾”dia x 36¾”height

### Contents:
1. 55 gal Poly Drum with Lever-lock style lid band
2. 100 - Sorbent Pads (16”x20”) Heavy Weight
3. 12 - Sorbent Socks (48”x3”)
4. 4 - Sorbent Socks (96”x3”)
5. 1 - Bag Granular All Purpose Absorbent (20lbs)
6. 20 - Hand Wipes
7. 2 - Pairs Disposable Coveralls
8. 1 - Knife
9. 1 - Roll Duct Tape
10. 3 - Disposable Respirators N95

Mercury Magnet™ Amalgamation Spill Powder  
A safe and effective method to suppress mercury vapors and amalgamate hazardous mercury-bearing spills.  
The kit contains basic personal safety wear, clean-up equipment and Mercury Magnet™ amalgamation powder.  
Designed for a quick response to Mercury Spills, including switches, thermometers, and fluorescent bulbs.  
The Mercury Magnet™ Spill Control kits include everything you need to clean up and recycle mercury spills quickly and safely.  
Mercury Magnet™ is effectively used in the following work areas:
- Chemical, Dental & University Laboratories  
- Hospitals  
- Dental Offices  
- Plants where neon signs, batteries, fluorescent and high intensity discharge lamps and mercury type instruments are manufactured and repaired

NEUTRALIZERS

Neutralizing Powders are designed to absorb and neutralize Acid and Alkaline Hazardous Spills.  
The built-in color indicator will change the color of the neutralizing powder as it neutralizes the spill.  
This feature of the product makes it safer to handle as the user will know if the spill is neutralized simply based on the appearance of the powder.

EPOXY

EPOXY PUTTY
- Repairs tanks, drums, pipes and castings.
- Works on damp or wet surfaces - even under water.
- Permanently patches holes, gouges and scratches in metal, concrete, wood, fiberglass and ceramics.
- Simply cut off the required amount and knead with fingers to a uniform color.

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

PLUG N DIKE - SEALANT
- Plug N’ Dike is an easy to use and convenient emergency sealant.
- The bentonite clay and polymer blend creates an instant seal on containers and drums, which helps to control leaks and spills of flammable or hazardous liquids.
- Non-toxic and non-flammable.
- Can be used with hydrocarbons and water based chemicals.
- Antifreeze mix prevents hardening in cold weather applications.

DRAIN COVERS

NEOPRENE DRAIN COVERS
- Used to prevent liquids from entering the drain system.
- Resistant to oil, water and most aggressive chemicals.
- Re-useable for greater cost savings.
- Lightweight, flexible and easy to use.

<table>

</tbody>
</table>

POLYURETHANE DRAIN COVERS
- Used to prevent contaminants from entering the drain system.
- Resistant to oil, water and most aggressive chemicals.
- Flexible non-absorbing material with reinforced tear-resistant mesh.
- Both sides will quickly seal drains.
- Re-useable for greater cost savings.
- Easily cleans with soap and water.
**GRANULAR**

**PLUS PREMIUM - Diatomaceous Multi-Purpose (medium grind)**
- Plus Premium is a multi purpose industrial strength granular absorbent.
- Extremely effective for controlling liquid spills & nasty odours.
- Used to soak up any liquid spill (except hydrofluoric acid).
- Ideal for Automotive, Airlines, Railroad, Industrial & Chemical Spills.
- Will not damage tile, concrete, asphalt, soil or plant life.
- Naturally suppresses odours. Improves traction for a safer workplace.
- Contains less than 1% free crystalline silica.
- Not affected by temperature changes.

</tbody>
</table>

**OPTISORB - Multi-Purpose (medium grind)**
- OptiSorb is made from 100% diatomaceous earth.
- Designed for quick clean up of water, oil and grease spills.
- 50% more absorbency per pound than clay alternatives.
- Works equally well on driveways, garage floors, work or home environments.
- Quickly and easily soaks up messy household spills.
- Provides more cost effective absorption.
- Used for emergency traction in snow or ice

<table>

**OCLANSORB - for Oils, Fuels, etc.**
- Oclansorb absorbent is manufactured from high quality Sphagnum Peat Moss
- Absorbs and encapsulates hydrocarbons (oils, diesel, fuels, etc.) on contact.
- Non-toxic, non-leaching, non-abrasive. Repels water.
- Absorbs on average 12 times its weight in medium oil.
- 1 lb. of Oclansorb will absorb approximately 1 gallon of oil
- Will reduce up to 90% of combustible vapors upon application due to its high vapor suppression capacity.
- Removes all free oil from spill sites upon extraction.

<table>

**CANSORB—for Oils, Fuels, etc.**
- Cansorb absorbent is manufactured from high quality Sphagnum Peat Moss.
- Due to its wicking action it absorbs and encapsulates hydrocarbons quickly on contact.
- Non-toxic, non-leaching, non-abrasive. Ideal for cleanup on both land and open water.
- Absorbs on average 8 times its weight. This volume is based on the hydrocarbon being absorbed and the temperature.
- The compressed bale can easily be broken down for disbursement.

TELESCOPIC SHOVELS
- Made from durable plastic.
- Compact for easy storage.
- Extends to 37”.

SPILL KIT SIGNS
- Clearly mark spill kit locations for quick response.
- Bold and easy to see signs help workers locate spill equipment fast.

NITRILE GLOVES
- Flock Lined
- Resistant to cuts, puncture and abrasion
- 13” length, 15 mil thick
- Color: Green

SPASH GOGGLES
- Indirect vent
- Impact proof lens
- Adjustable elastic headband

PVC APRONS
- Flame and Oil resistant
- PVC on polyester
- Bib style, heavy duty
- Color: Yellow

TYVEK COVERALLS
- Hooded with serged seams, front zipper closure, elastic wrists and ankles

Arcus LWS™
Liquid Waste Solidifier
for water based liquids

LWS is a granular solidifying agent specifically developed to absorb Water Based liquids. It is non-toxic, odorless and when wet, swells to form a tight gel that holds water molecules under pressure.

**Economical**
LWS rapidly absorbs and retains up to 300 times its weight in water and expands in volume by less than 1%. This translates into **Minimal Volume and Weight Increase and Lower Transportation and Disposal Costs**.

Traditional solidification methods using sawdust, clay (kitty litter), kiln dust, cement and sand significantly increase the volume of material and the resulting cost of transportation and disposal.

**Usage**
LWS is used effectively to solidify a wide range of aqueous waste streams such as:
- Industrial Sludge
- Non-Hazardous Liquid Waste
- Low Level Radioactive Liquid Waste
- Inks & Dyes
- Latex Paint
- Coolants and many more ..........

It is easy to use and requires no special training. Simply add directly to the liquid and agitate. For your convenience LWS is supplied in shakers, pails, bags and bulk supersacks.

**Toxicity**
LWS is non-toxic and non-biodegradable. It is one of a family of products that has undergone extensive testing for applications ranging from agriculture to personal hygiene and food packaging.

**ARCUS PWS™**

*For Solidification of Petrochemical Spills on Land and Water*

- PWS defines a new class of absorbent polymers specifically formulated to protect you and the environment against accidental spills.

- PWS quickly encapsulates petrochemical spills on contact, shortening cleanup times, minimizing costs and providing an immeasurable peace of mind.

**Description:**
PWS is a white, non-toxic, granular synthetic rubber product designed to absorb petroleum based liquids. The product swells to form a gel that is incinerable to <2% ash. It is insoluble in water and can safely absorb hydrocarbon spills in waterways without effecting the environment.

**Economical:**
PWS is lightweight, clean and efficient. It absorbs up to 12 times its weight with:

- superior price performance ratio
- less work to apply and retrieve
- lower volume and mass of waste
- lower disposal costs
- lower transportation and storage costs

**Toxicity:**
PWS is non hazardous as defined by OSHA under its hazard communication standard (HCS) 29 CFR1910.1200 and can be safely disposed into landfill.

*When used to absorb toxic or hazardous materials it must always be disposed of in accordance with local, provincial and federal regulations.*

**Safety:**
PWS reduces vapor pressure of absorbed liquids resulting in:

- reduced flammability and explosion risk
- reduced harmful vapors and potential danger to humans
- ignited liquids burn less fiercely

**Use:**
Quickly immobilize spills by encapsulating a wide array of petroleum products including:

*Motor Oil, Diesel fuel, Transformer Oil, Oil Based Paints, Crude Oil, Jet Fuel, Lacquer Thinner, Gasoline, Transmission Fluid, Citrus Oil ............*

---

MULTIFUNCTIONAL UNITS IMPROVE PRODUCTIVITY, KEEP PERSONNEL SAFE FROM ACCIDENTAL SLIPS, LIMIT LIABILITY AND CLEANUP COSTS FROM HAZARDOUS SPILLS.

- Moulded from UV protected 100% Recycled Polyethylene
- Nearly impervious to chemical attack from hazardous acids, caustics and solvents, and they resist deterioration in rough environments
- Ideal platforms for 30 and 55 US gallon drums or other containers stored indoors
- Seamless construction eliminates leaks
- Oversized spill sump meets or exceeds the most stringent of spill containment regulations
- Self-locating grates lift off quickly for clean up
- A low profile assures convenience and ease of loading
- Wide forklift pockets facilitate relocation of loaded pallets
- Black colour hides grime and dirt to keep your workplace looking clean
- Choose from square or in-line configurations
- Square pallet accommodates four drums and can be equipped with an optional ramp. In-line styles are designed for two, three or four drums
- Three and four-drum in-line units are not forkliftable
- Complies with 40CFR 264.175 and Uniform Fire Code

LOW PROFILE - ACCUMULATION CENTRES

- Economical solution to spill concerns during drum filling and dispensing operations
- Ideal for chemical or battery storage needs
- Seamless construction in 100% Recycled Polyethylene eliminates leaks
- Nearly impervious to chemicals including acids and corrosives
- Sturdy, self-locating grates eliminate the chance of ride-up and remove for easy cleaning

**RAMP**

- Facilitates loading and unloading of heavy drums
- Features anti-skid ribs for maximum safety
- Can be conveniently located anywhere, on any size pallet
- Combine 2, 4, 6, and 8-drum modular units to create your own customized system with convenient joining clips

**JOINING CLIPS**

- Firmly lock units together and expand your storage space
- Sumps remain separate and clips can be removed for easy repositioning
- Stainless steel

**SUPER STRENGTH**

Long lasting pallets offer super strong, nearly 2 1/2" thick grates for superior crack resistance. Self-locating, they reduce the chance of grate "ride-up" and remove for easy cleaning. Sturdy, low profile design features a unique sump with multiple integral structural supports to handle heavy loads.

Build your own customized system. By joining pallets together for a total of 66-gallon capacity, you will meet EPA and UFC requirements with the Sump-to-Sump Drain Kit.
**4 drum - square**
- 100% polyethylene—provides excellent chemical resistance
- Two removable grates
- Holds four 55-gallon drums
- Forkliftable from all sides
- Meets EPA 40 CFR 264.175

Also available with:
- Drain hole plug
- Optional tarp for outside storage

STORAGE

HARDCOVER DRUM & SPILL PALLET SYSTEMS
- Ideal for indoor/outdoor storage of 55 US gallon drums
- Roll-top design allows it to be used in limited space or next to buildings where swing-open doors would be a problem
- Top or front loadable
- Poly-Ramp available to assist in the loading of drums
- Optional drain

2-DRUM HARDCOVER & SPILL PALLET
- Holds up to two 55 US gallon drums
- Used in conjunction with in-line spill pallet #5253-YE (53½"L x 29½"W x 17¾”H)
- Load bearing capacity of 2000 lbs.
- Sump capacity of 58 US gallons
- Optional ramp extender to accommodate 17” high pallets

4-DRUM HARDCOVER & SPILL PALLET
- Holds up to four 55 US gallon drums
- Used in conjunction with square spill pallet #5400-YE (54½"L x 54½"W x 12¾”H)
- Load bearing capacity of 6000 lbs.
- Sump capacity of 66 US gallons

INTERMEDIATE BULK CONTAINMENT

IBC 2000i™
- Fits more than 99% of all IBC dispensing units
- Large sump capacity of 385 US gallons, exceeding EPA 40 CFR 264.175 regulations
- Equipped with an integrated 5-gallon pail holder for quick and easy dispensing
- 1-piece, lightweight, 100% polyethylene
- Forkliftable and nestable
- Will not rust or corrode or have adverse reactions with chemicals
- Optional drain

- Exterior Dimensions: 73" L x 80½" W x 29½“ H
- Pedestal Dimensions: 56¾" L x 56¾" W x 29½” H

IBC SPACE-SAVER™
- Floor space efficient alternative for storing, dispensing and containing IBC totes
- Solid 100% polyethylene construction
- Will not rust, corrode or have adverse reactions with chemicals
- Sump capacity: 330 US gallons
- Load capacity: 3000 lbs.
- Optional drain

- Exterior dimensions: 57" L x 57" W x 47” H

#4000-YE Hazard Hut®
- 100% polyethylene, one piece moulded construction so there are no joints or seams to leak
- Moulded-in side vents reduce fumes and condensation inside, UV protected outside
- Removable grates for easy cleaning
- Double doors provide easy access for up to four 55-gallon drums
- Double wall construction and heavy duty hinges and lock latches keep contents secure
- Four way forklift entry design
- Loading the Hazard Hut® is easy with the Poly Ramp

#4010-YE Job Hut®
- Practical and affordable outdoor storage
- Tough 100% polyethylene construction
- Won't rust or corrode
-oulded-in vents to reduce fumes and condensation inside, UV inhibitors outside
- Structural foam grates remove for easy cleaning
- Extra wide doorway allows for easy forklift entry
- Heavy duty double walled doors and lock keep contents secure
- Forklift able from all sides for effortless handling
- Multi purpose ramp attaches in seconds
- Tie down feature for secure anchorage
- Store up to eight 55-gallon drums
- Low profile design allows for easy access
- Meets EPA regulation 40 CFR 264.175, it is not fire rated

STORAGE - POLYETHYLENE (INDOOR or OUTDOOR)

# 2038-YE Poly-Safetypack®
- 100% polyethylene construction has excellent resistance to chemicals and the weather.
- Tough indoor or outdoor performer protects two 55-gallon drums.
- Hinged, gull-wing covers provide convenient safe access for decanting and removal of drums.
- Items inside are protected from the weather with slide-over lid design.
- Security locks are included to secure the covers and contents.
- Removable polyethylene grating 48" x 24" x 1%.
- Translucent yellow sidewalls allow visual leak detection without removing lids.
- Easily handled by forklift or pallet jack from two sides.
- For easier mobility use the caster frame assembly # 2200-BK.

# 2077-YE Poly-Safetypack® Plus
- Taller for Secure Pumping Stations.
- # 2077-YE Poly-Safetypack Plus provides the same results as the # 2038-YE Poly-Safetypack (above) with one key advantage, the 54.25" inside height of the Poly-Safetypack Plus allows the lids to be closed with the pumps in place to create a versatile pumping station where the convenience of leaving the pumps installed is important.
- Capacity is also greater, 270 gallons.
- Optional drain.

Overpack 20 & 30 gallon salvage drums are versatile units that can directly contain solids and sludges with security. With a ½ turn lid, this ergonomically designed unit allows for easy access, unlike traditional “hoop-ring designs.” Units are also nestable, which allows for ease of shipment.

Overpack 65 gallon salvage drum meets Group 1 packaging standards, salvage drum regulations, and is designed to fit 30-gallon drums. It meets performance-oriented packaging requirements of US DOT and UN regulations. This overpack nests for easy storage and has a gasket in the lid for secure containment with no wasted space.

Overpack 95 gallon meets Group 1 packaging standards and salvage drum regulations. It also meets performance-oriented packaging requirements of U.S. DOT and UN regulations. It safely contains a wide range of hazardous materials, including acids, corrosives and damaged parts, in 55-gallon drums. Tight, secure and leak-free container closing is simple. Just place any long object, like a wooden two-by-four in the handy lid slots and turn it to tightly screw the lid down.

**Plastic Containers with Snap-On lid (yellow)**
- All-plastic, professional-grade construction will not rust, chip or peel; resists dents.
- Strong, snap-on lids are available for secure, stable stacking.
- Reinforced rims add strength and durability.
- Built-in handles allow easy, non-slip lifting and anti-jam nesting.
- Double-ribbed base increases stability and dragging capacity.

**Plastic Dolly (black)**
- Easy mobility and maneuverability of heavy loads.
- All plastic construction resists rust, chipping and denting.
- Heavy-duty wheels with swivel capabilities provide for ease of mobility.
- User-friendly solution for moving heavy loads.

**Drum-Up Trays**
- Catch liquid before it reaches the floor, reducing the risk of slip and fall injuries
- Ideal for use as a drum pumping station
- Secondary containment unit features a unique geometric design covering more floor area
- Drain hole makes emptying easy
- Contains drips for containers up to 55 US gallons
- Control nuisance spills - 20 US gallon capacity

*Drum not included

**Drum-Up JR**
- Containment for 16 to 30 US gallon drums and 5-gallon pails
- 7 1/2 US gallon capacity

*Pail not included

**Spill Scooter**
- Polyethylene construction
- Contains incidental spills and drips
- Spout included for easy draining
- Holds 55 US gallon drums
- Optional metal T-handle available separately, 36 5/8" long
- 34 1/2” diameter x 9” high
- 500-lb load bearing
- 10 US gallon capacity

*Drum not included

**Poly-Dolly®- The Multi-Functional, Two-Wheel Dispensing Station**
- Holds 55 US gallon drums
- Tilts to become an efficient self-dispensing station
- Acts as its own secondary containment unit
- Integrally molded handles for extra strength
- Double looped strap for easy loading
- Accessible to forklift from the rear
- Raised ribbed dispensing well
- Drain plug for removal of contents from sump
- Available as an all terrain dolly
- 69” L x 32 1/2” W x 26 1/2” H
- 80 US gallon sump capacity
- 600-lb handling capacity

*Drum not included
